

**Increased efficiency, productivity and profitability is our sole priority**

We keep a strict business focus at PremiTech. At the end of the day, all that matters is the figure at the bottom line. Although our solutions and services are among the most sophisticated available today, derived from engineering expertise and standard software that are on the cutting-edge, our mission at PremiTech is really quite simple: Enable businesses and IT professionals to switch from a fragmented focus on technology to a new holistic approach with a crystal clear goal - shorten time-to-market, improve quality and lower the price. In other words: faster, better and cheaper!

**Get focused with the most effective IT performance software on the market**

Competition calls for focus. Enterprises are forced to focus scarce resources on the strategies most likely to yield success, and these strategies are dependent on IT systems. PremiTech has developed the most effective software solution on the market for managing IT system performance. Optimize your IT systems and put the focus back on business with PremiTech.

With Performance Guard™ and Performance Guard Back-End™ previous investments in IT systems can be leveraged by getting pinpoint precision performance data – in business terms – on all aspects of an IT system. Performance Guard™ is now in service at more than 650 sites in more than 100 countries around the world.

With Shark™, in-house application development can be brought back on track. Focus on what really matters for your business, and let PremiTech provide the right tool for the job.

**Take advantage of PremiTech's best practices know-how**

Business today must deliver. Use PremiTech's best practices know-how within IT system performance to make your system run smoothly and efficiently - and stay that way – so you can keep ahead of your competitors.

Take advantage of us! Visit us at [PremiTech.com](http://PremiTech.com), browse the PremiTech areas of expertise, and get the full story about our technology and innovative standard software.

CEO, Jan Nielsen has held top management positions at international software corporations such as SCO, Parametric Technology, Informix and Ascential Software. He is the former Managing Director at SCO Nordic and of Informix Nordic, and before joining PremiTech he held a position as Strategic Alliance Director at Ascential Software. Mr. Nielsen holds a BA in Political Science and Computers from Copenhagen University and he received his management training at Insead, France.

## About us

PremiTech was founded in 1999 by Lars Haaugaard (M.S. in Electrical Engineering) and Martin Roth (M.S. in Computer Aided Design). Both founders have gained unique skills and knowledge about the optimization of large database systems and applications from positions held within major international companies.

In the spring of 2000, Venture IT - a subsidiary of Maersk Data A/S - became a major shareholder in PremiTech, and by the end of 2000, the first collection of software solutions from PremiTech entered the market. Shortly after the Venture IT investment in PremiTech, the venture companies "Dansk Erhvervs Investering" and Strandgade Holding became shareholders as well.

PremiTech has filed international patent applications protecting central parts of the PremiTech technology, which in most cases delivers performance that is ten times better than other solutions.

Most of our clients are governmental institutions, international financial companies, insurance companies and companies dealing with transportation of any kind.
