

JETRO COCKPIT-On-Key™

*Installation-free mobile solution
for secure access
to enterprise applications
from any PC, anywhere in the world*

PRODUCT OVERVIEW

COCKPIT-On-Key™ is an innovative member of the Jetro COCKPIT® product family. It enables COCKPIT administrators to package a personalized COCKPIT client into a single executable file that can be uploaded to any USB disk-on-key/Flash disk or other portable storage devices. In doing so, COCKPIT-On-Key allows users to log into their enterprise environment from any Windows-based PC connected to the internet. No installation is required and the secure solution leaves no files or records on the host PC. This makes for a simple, friendly and secure working experience.

COCKPIT-On-Key is simple to use and easy to carry around. It enables instant access to crucial data and applications from virtually anywhere in the world. COCKPIT-On-Key also ensures secure transmission of data by utilizing Jetro's

COCKPIT Secure Connector (CSC) Technology to encrypt all the communication between the client and the enterprise.

Jetro's COCKPIT-On-Key comes complete with a Portable Client Packager. This utility enables administrators to create a COCKPIT-On-Key Client executable by using pre-configured connection parameters. The Packager packages the COCKPIT Client into a single executable file that can be placed on a USB disk-on-key/Flash disk or any other portable storage device. Inserting the USB device into any computer automatically launches and runs the COCKPIT Client according to the pre-configured parameters. Removing the USB device from the computer will close the client without leaving any traces on the host computer.

Unique Advantages

- *Secure immediate access to corporate network resources from any pc, anywhere, anytime*
- *Simple and secure working experience*
- *Easy to use and carry around*
- *Ensures business continuity*
- *No installation required*
- *Does not leave any footprints or files on the host PC*

JETRO COCKPIT-On-Key™

The new COCKPIT-On-Key is simple to use and easy to carry around. It allows instant access to crucial data and applications from virtually anywhere in the world.

Features and Benefits

Supports standard COCKPIT Client features including:

- User authentication
- Seamless application windows
- Secure/remote printing solution
- Encrypted communication
- Thin/Light-weight client

True plug-and-play device

- Following authentication, users gain direct access to their enterprise working environment
- Utilizes Jetro's COCKPIT Secure-Connector (CSC) Technology to ensure secure bridging between the internet, the DMZ, and the corporate network
- The configuration parameters can be pre-configured on a mobile USB device using the Client Packager utility

Friendly, Seamless, Portable and Safe

- Simple to use and easy to carry around
- Allows instant access to crucial data from virtually anywhere in the world
- Create USB Clients for existing COCKPIT domains

Integrated Keys with PKI Devices

- Allows integration of COCKPIT-On-Key with PKI authentication devices
- Fully functioning user authentication and CSC Client on the same device

Create your own Keys

- Use Jetro's COCKPIT-On-Key Client-Packager utility to define and create individual and personalized configurations
- Fits any USB storage device
- Personalize the COCKPIT device to your corporate brand

The Jetro Difference

With Jetro's COCKPIT-On-Key, secure access to the corporate network is always at your fingertips. Easy to store and carry around, the portable COCKPIT client helps ensure business continuity and provides users with the same working environment they have learned to trust and depend upon. A user-friendly device, COCKPIT-On-Key can be put to use the moment it is plugged in, requiring no configuration or installation on the user side.
